Govind Kumar

Software Engineer

Delhi NCR, India | +91 7488229660 | govindjha.mailbox@gmail.com | LinkedIn

Professional Summary

Software Engineer with 2+ years of experience in Java, Spring Boot, microservices, RESTful APIs, and SQL. Experienced in database optimization, caching, unit testing, debugging, and production support for enterprise applications. Leveraged AI-assisted development tools, including Claude and GitHub Copilot, to improve development efficiency and streamline software engineering workflows.

Technical Skills

Languages: Java, SQL
Frameworks: Spring Boot, Spring Data JPA, Hibernate, JUnit 5, Mockito
Backend: Microservices, RESTful APIs, JDBC
Databases: Microsoft SQL Server, MySQL
Security: JWT Authentication, Biometric Authentication
Caching: Caffeine Cache, Apache Geode (GemFire)
Core Java: OOP, Collections, Streams, Lambda Expressions, Multithreading, JVM, Design Patterns
AI Technologies: Spring AI, LLM Integration, Prompt Engineering, RAG, MCP, Vector Search, Context Engineering
Developer Tools: Git, GitLab, Maven, Postman, Kibana, SonarQube, SSMS, Jira, GitHub Copilot, Claude
DevOps & Infrastructure: Docker, Nginx

Professional Experience

Software Engineer | LTM **Aug 2024 – Present**
Project: PAN 2.0
Enterprise tax administration modernization platform supporting PAN application processing, corrections, status tracking, and related workflows through microservices.

- Developed and maintained 20+ RESTful APIs across 10 Spring Boot microservices using Java 21 for PAN-related workflows.
- Implemented request validation, centralized exception handling, and standardized REST API responses.
- Developed JDBC-based database modules using Microsoft SQL Server and optimized complex SQL queries to improve database performance.
- Used Claude as an AI-assisted development tool to analyze code, troubleshoot issues, and support implementation and code optimization.
- Implemented Caffeine Cache and Apache Geode (GemFire) to reduce database calls and improve API response times.
- Integrated biometric authentication APIs to support secure user identity verification.
- Maintained 80%+ unit test coverage using JUnit 5 and Mockito, and resolved code quality issues identified through SonarQube.
- Analyzed Kibana logs, performed root cause analysis, debugged issues, and resolved production defects.

Projects

Employee Management System
Tech Stack: Java, Spring Boot, Spring Data JPA, Hibernate, MySQL, Netflix Eureka, OpenFeign, Maven

- Developed an application to manage employee records and department information using Java and Spring Boot.
- Registered microservices with Netflix Eureka Server for service discovery and implemented inter-service communication using OpenFeign.
- Implemented centralized exception handling using `@ControllerAdvice` and `@ExceptionHandler` to provide consistent error responses across REST APIs.

E-Learning Platform
Tech Stack: Java, Spring Boot, Spring Data JPA, Hibernate, MySQL, JWT, JUnit 5, Maven

- Developed a layered Spring Boot backend with REST APIs for user, course, enrollment, and content management.
- Implemented JWT-based authentication, role-based authorization, request validation, and centralized exception handling.
- Implemented data persistence using Spring Data JPA and Hibernate with MySQL and maintained 80%+ unit test coverage using JUnit 5.

Education

Galgotias University **2019 – 2023**
Bachelor of Technology (B.Tech) CGPA: 8.01/10

Certifications

- Microsoft Certified: Azure Fundamentals (AZ-900)
- Claude Certified Associate – Foundation (Anthropic)
